

# Lesson 3 Testing Materials & Tools Data Sheet (Page 2)

## 2. Removing the Oil

Directions: Test each material or tool to see how well it removes the oil from the surface of the water. Record your observations in the table below.

Material or Tool	Draw what the surface of the water looked like after you tested the material. Label the oil.	<b>Observations:</b> <ul style="list-style-type: none"> <li>• What happened after you tested the material?</li> <li>• How spread out is the oil now?</li> <li>• Is it in a thick layer or a thin layer?</li> </ul>
Cotton Ball	<p style="text-align: center;">Top View</p> 	
Sponge	<p style="text-align: center;">Top View</p> 	
Paper Filter	<p style="text-align: center;">Top View</p>
